

## **News Release**

*For Immediate Release April 10, 2012*

### **FreedomPACS Invites MASA Annual Session Attendees to Learn More about Web-based Radiology Imaging**

*Radiology PACS provider offers affordable medical imaging solution to Alabama professionals;  
Booth visitors can register to win a free Visa gift card*

SOUTHFIELD, MICH. — PACS System provider [FreedomPACS™](#) announced that it will be attending and exhibiting at the 2012 [Medical Association of the State of Alabama \(MASA\) 2012 Annual Session](#) on April 12-14 at the Wynfrey Hotel in Birmingham, Ala. The 2012 MASA Annual Conference will be attended by physicians and medical professionals throughout Alabama. The association event will be focused on leadership, providing education, as well as opportunities to network with attendees and exhibitors. FreedomPACS provides web-based radiology PACS systems to physician practices, radiologists, and hospitals.

FreedomPACS invites all MASA Annual Session attendees to visit Booth 7 to learn how [web-based PACS](#) can help make your practice more effective and efficient.

- Learn more with a demo—experience our web-based DICOM viewer firsthand
- Access studies quickly with multiple search categories and gather global worklists from disparate PACS
- Take one step closer to HIPAA compliance with our off-site cloud storage
- Use FreedomPACS from your desktop, iPad or Android device

#### **About FreedomPACS™**

FreedomPACS (<http://www.freedompacs.net>) is a cost-effective medical Picture Archiving and Communication System (PACS) that provides convenient, economical access and archiving of images from multiple modalities (like CT or MRI) using cloud technology. This radiology PACS system is HIPAA-compliant, incorporates DICOM standards and can be accessed on PC or MAC as well as mobile platforms like iPad and Android. FreedomPACS is

owned by MN Systems, headquartered in Southfield, MI, a joint venture between a medical software development company and a group of practicing physicians. MN Systems brings technology and medical expertise to its customers, combining software development knowledge and physician experience to provide affordable, efficient, and leading-edge medical software solutions to ultimately improve patient care.
