FreedomPACS to Exhibit at 2012 TORCH

Hospital Information Technology Conference (HITCON), October 17-18

Attendees can demo, access special pricing for radiology PACS and Cloud Image Storage Provider

SOUTHFIELD, MICH. — Radiology medical technology provider [FreedomPACS™](#) announced that it will be attending and exhibiting at the 2012 [Texas Organization of Rural & Community Hospitals \(TORCH\) HITCON12](#) on October 17-18 at the Omni San Antonio Hotel at the Colonnade in San Antonio, Texas.

FreedomPACS provides radiology PACS systems, affordable cloud image off-site storage, and a user-friendly cross platform diagnostic image viewer to hospitals, physician practices and radiologists.

The 2012 TORCH HITCON is the only conference in Texas solely dedicated to hospital information technology and will provide key information and vendors to help rural hospitals keep up with the rapid pace of change and adoption that hospitals and other healthcare providers are facing.

FreedomPACS invites all HITCON attendees to visit their booth to learn more about how FreedomPACS and FreedomPACS Cloud can help medical facilities become more efficient, improve patient care, and bring savings to the bottom line. FreedomPACS Cloud is affordable off-site image archiving and storage that is HIPPA-compliant and designed to safeguard data in case of a natural disaster.

Visit the FreedomPACS Booth to:

- View demonstrations of FreedomPACS & user-friendly **diagnostic DICOM viewer**—instant image access on Windows, Mac, iPad or Android
- Access **special pricing of \$1 a study** for off-site storage—offered for a limited time to HITCON attendees (some restrictions may apply)
- Register to win a **free \$50 Visa gift card**.

To set up an appointment, [visit our form online](#) or call 855-740-1130.

About FreedomPACS™ & FreedomPACS Cloud

FreedomPACS (<http://www.freedompacs.net>) is a cost-effective medical Picture Archiving and Communication System (PACS) that provides convenient, economical access and archiving of images from multiple modalities using cloud technology. This radiology PACS system incorporates DICOM standards and can be accessed on Windows or Mac as well as mobile platforms like iPad and Android.

FreedomPACS Cloud offers secure, HIPAA-compliant off-site storage for radiology images. Available with or without a PACS system, this affordably priced solution harnesses the protection and efficiency of the cloud. It provides instant access and can integrate with other medical, equipment or PACS systems. FreedomPACS is owned by MN Systems, headquartered in Southfield, MI, a joint venture between a medical software development company and a group of practicing physicians.
